

A large black vinyl record is centered against a solid red background. The record has a prominent blue circular label in the center. On the label, the words "Moosic Project" are written in a white, cursive, sans-serif font, stacked vertically. Below this, in a smaller white font, is a red rounded rectangular button containing the text "LETS PLAY!".

Moosic
Project

LETS PLAY!

Prototype

How was the Prototype Created

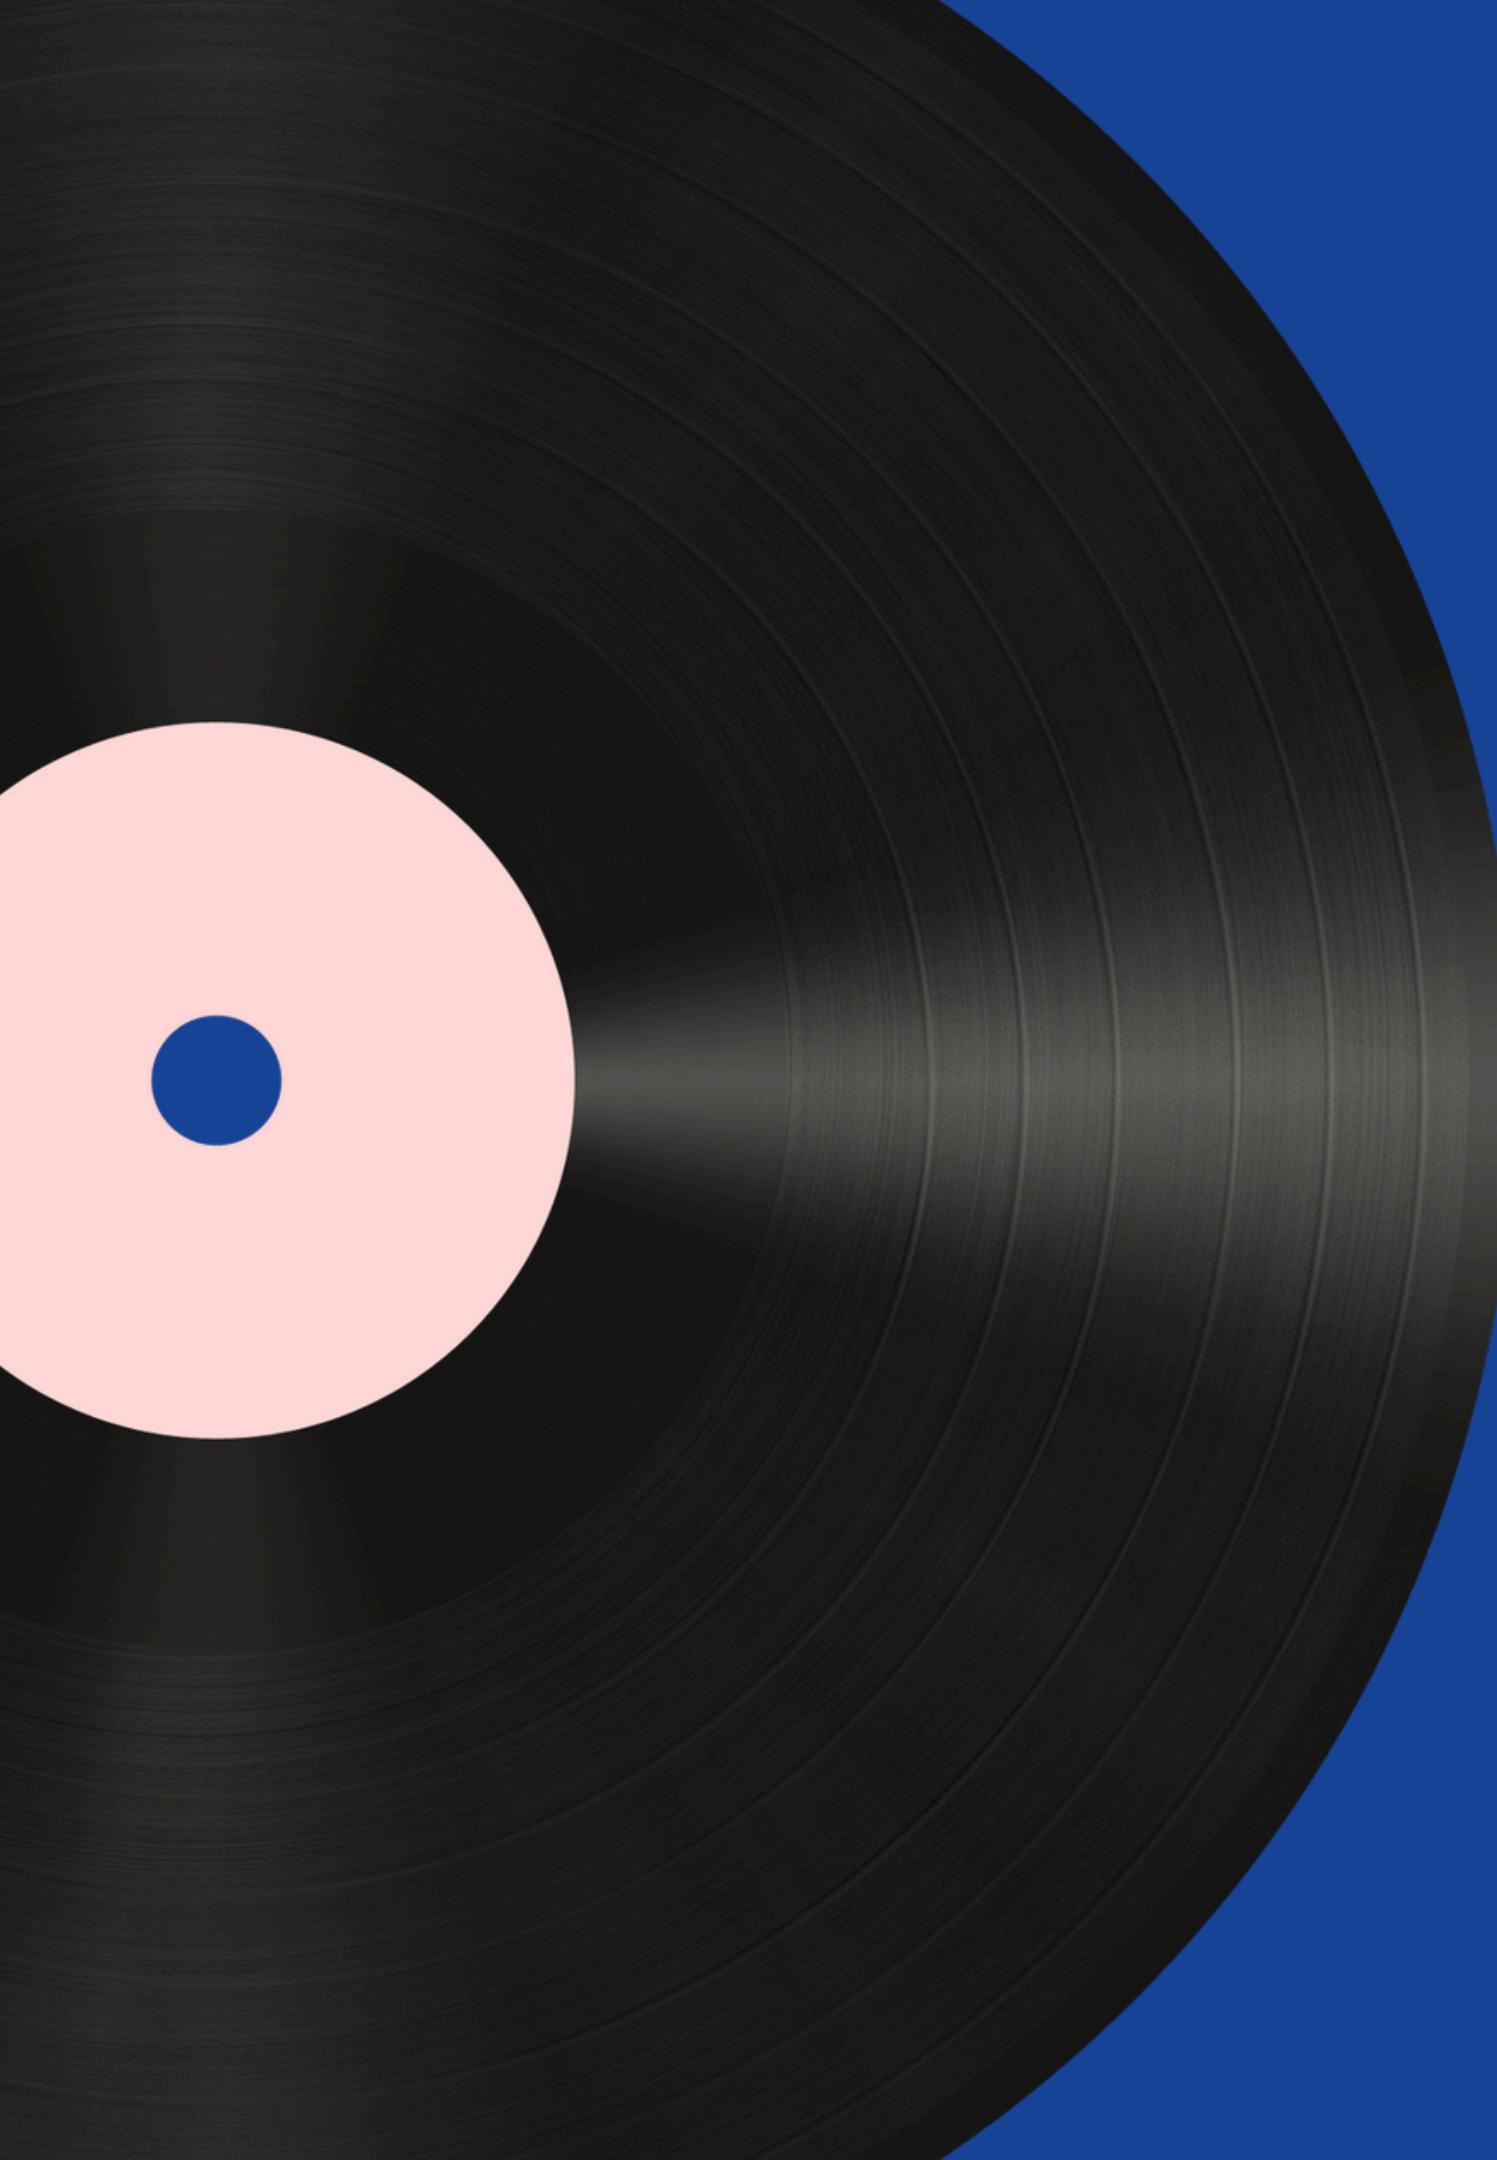

Processed the data

- Feature Selection
- K- Means
- Evaluation Anaysis

Playlist creation

*Are You
Ready?*

Is K-Means a good method to create playlists?

Pros #1

Good starting point

Pros #2

Interpretability

Cons #1

Sensitivity to Outliers

Cons #2

Choosing the numbers of groups
(Clusters)

The next Step

- Using different methods
 - Automatic Naming
 - Adding feedback Mechanism

*Thanks for
listening!*
